Intro to Vision Language Models (Hugging Face smol course, Unit 3)

Completion Evidence — Jacob Lacy (Hugging Face: aavk, GitHub: a-vvk)

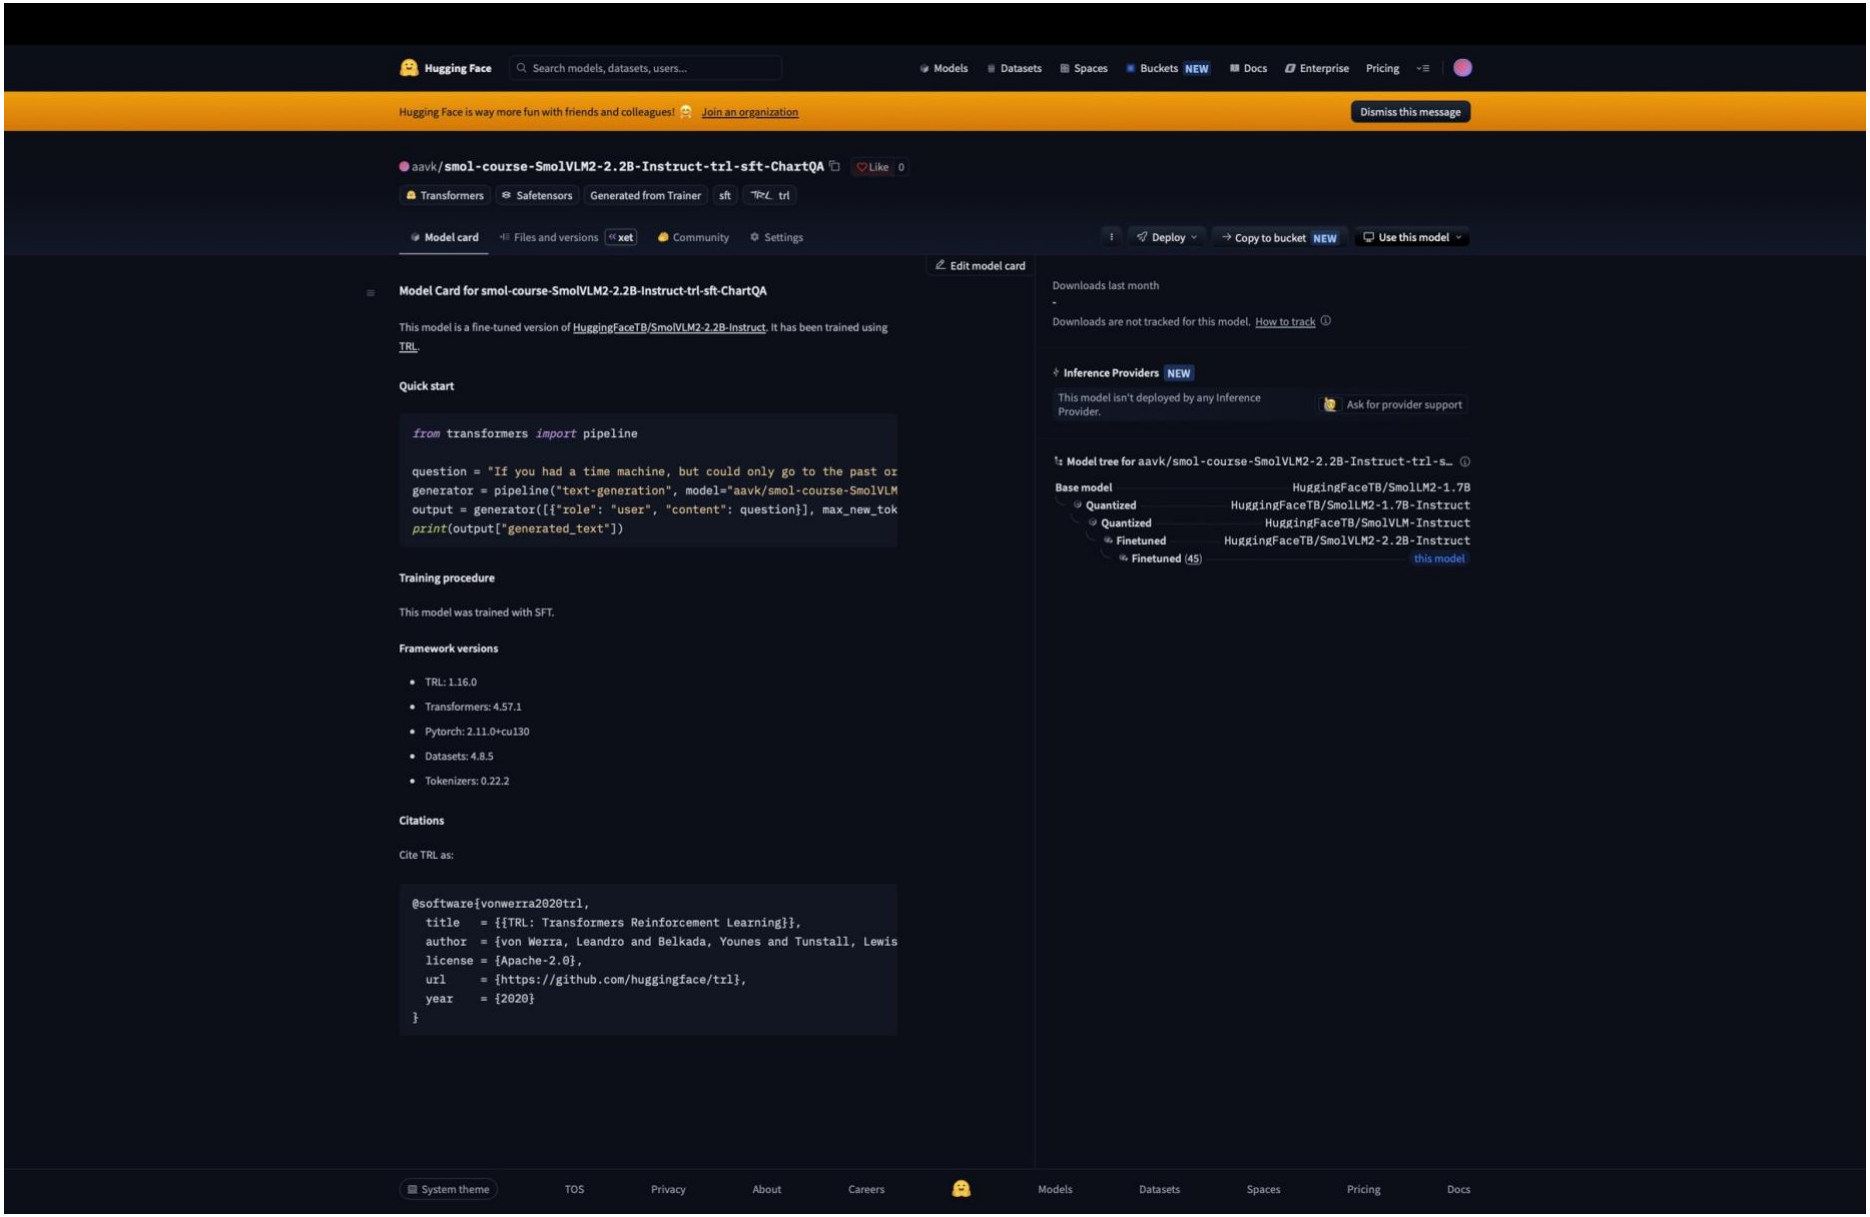

TRM 1B - Artefacts A3 and A4

Contents

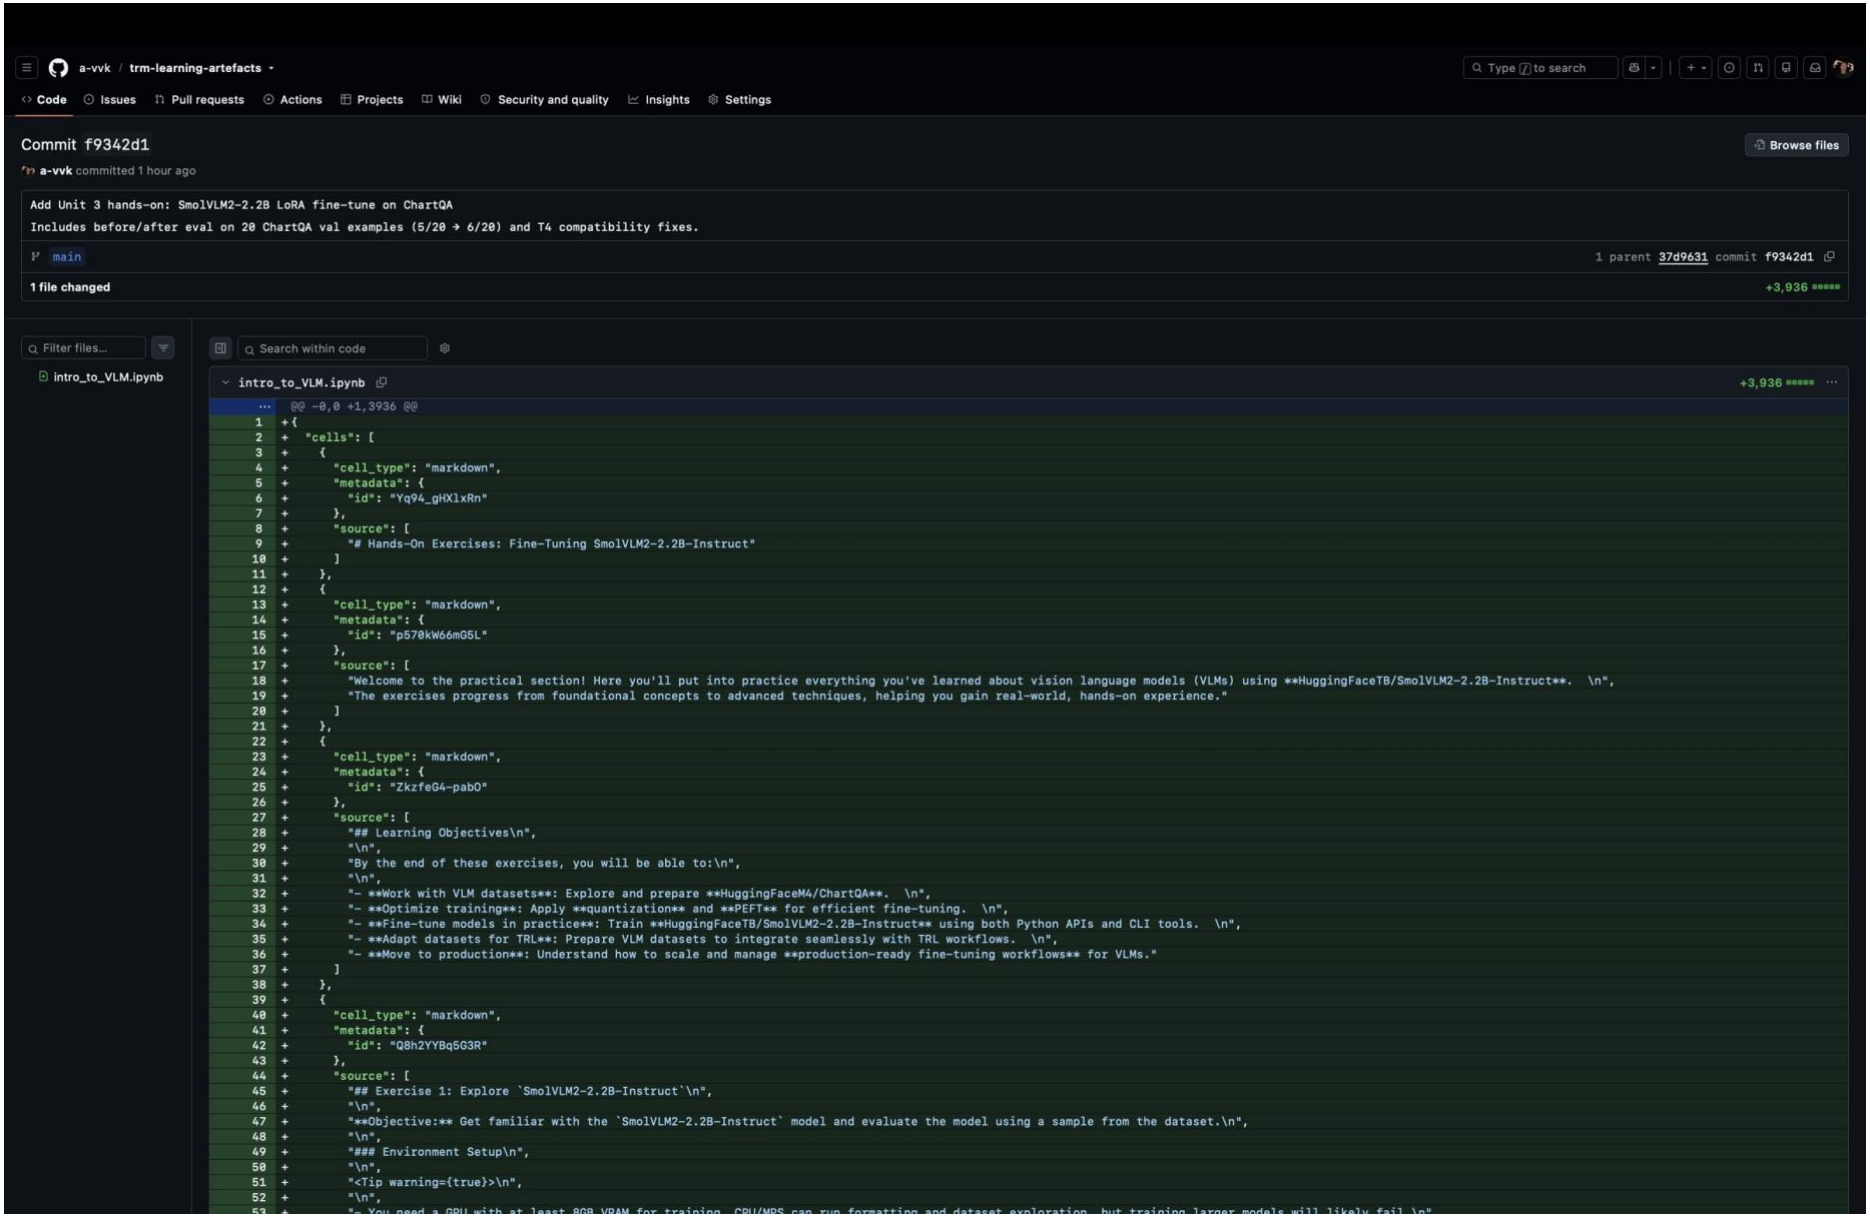

- Fine-tuned LoRA Adapter on Hugging Face Hub (Artefact A3)
- Training Notebook on GitHub (Artefact A3)
- Unit Certificate (Artefact A4)

I completed the unit's learning on 12–13 October 2026 and the hands-on fine-tuning exercise on 20 October 2026. The exercise fine-tuned SmolVLM2-2.2B-Instruct on ChartQA with LoRA; the trained adapter was pushed to my Hugging Face account and the training notebook, with its outputs and before/after evaluation, was uploaded to GitHub. The certificate names the unit “4. Vision Language Models” because it numbers units differently from the course website, where this is Unit 3.
